-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The amendment filed May 30, 2006 and the remarks presented therewith have been carefully considered and are deemed to overcome the rejections set forth in the first Office action. However, a new non-final rejection follows below.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over German Patent DE 3238062.

The German ('062) patent discloses a device for collecting animal excreta by dispensing a freezing component therearound to harden the excreta and subsequently lifting the hardened excreta from the surface it was deposited on. The German ('062) patent lists domestic cats as an example of an animal whose excreta can be collected in this manner. Domestic cats are often trained to defecate in litter boxes that contain sand-like litter. When using the German ('062) device to collect excreta deposited on or in conventional sand-like litter, it would be probable that the aerosol freezing component would contact grains of sand (wherein these grains can be considered solid bodies) disposed on the surface of the excreta. Thus, in claim 18 of the instant application, the

steps of "contacting the excreta with a solid body", "form a bond between the excreta and the solid body", and "lifting the solid body" would inherently occur assuming the excreta has been deposited, frozen, and then removed from a standard cat litter box with each grain of the litter being a "solid body".

Allowable Subject Matter

3. Claims 1-13 and 15-17 are allowed.

Drawings

4. The corrected drawings were received on 5/30/06. These drawings are approved by the examiner.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean J. Kramer whose telephone number is (571) 272-6926. The examiner can normally be reached on Mon., Tues., Thurs., Fri..
